SARA SILVA

Fashion Designer

Footwear & Apparel

HI,

Haven't we met yet?

My name is Sara Silva and I have been a fashion designer for 10 years for the footwear and textile industries.

My passion for fashion started when I was only a child, and at the age of 7 I've decided that fashion design would be my future.

It was at my mother's small atelier that I've created my first products to use on my dolls and ever since I've never stopped my research and development at fashion industry.

Over the years I have gained skills, sharpened my technique and creative process.
I take on every project as a opportunity to improve and challenge myself.

In this portfolio I present the various products I have developed over these years, and the brands I have worked for. Here I show my creative process, the software used and most importantly, the flexibility of creative thinking.

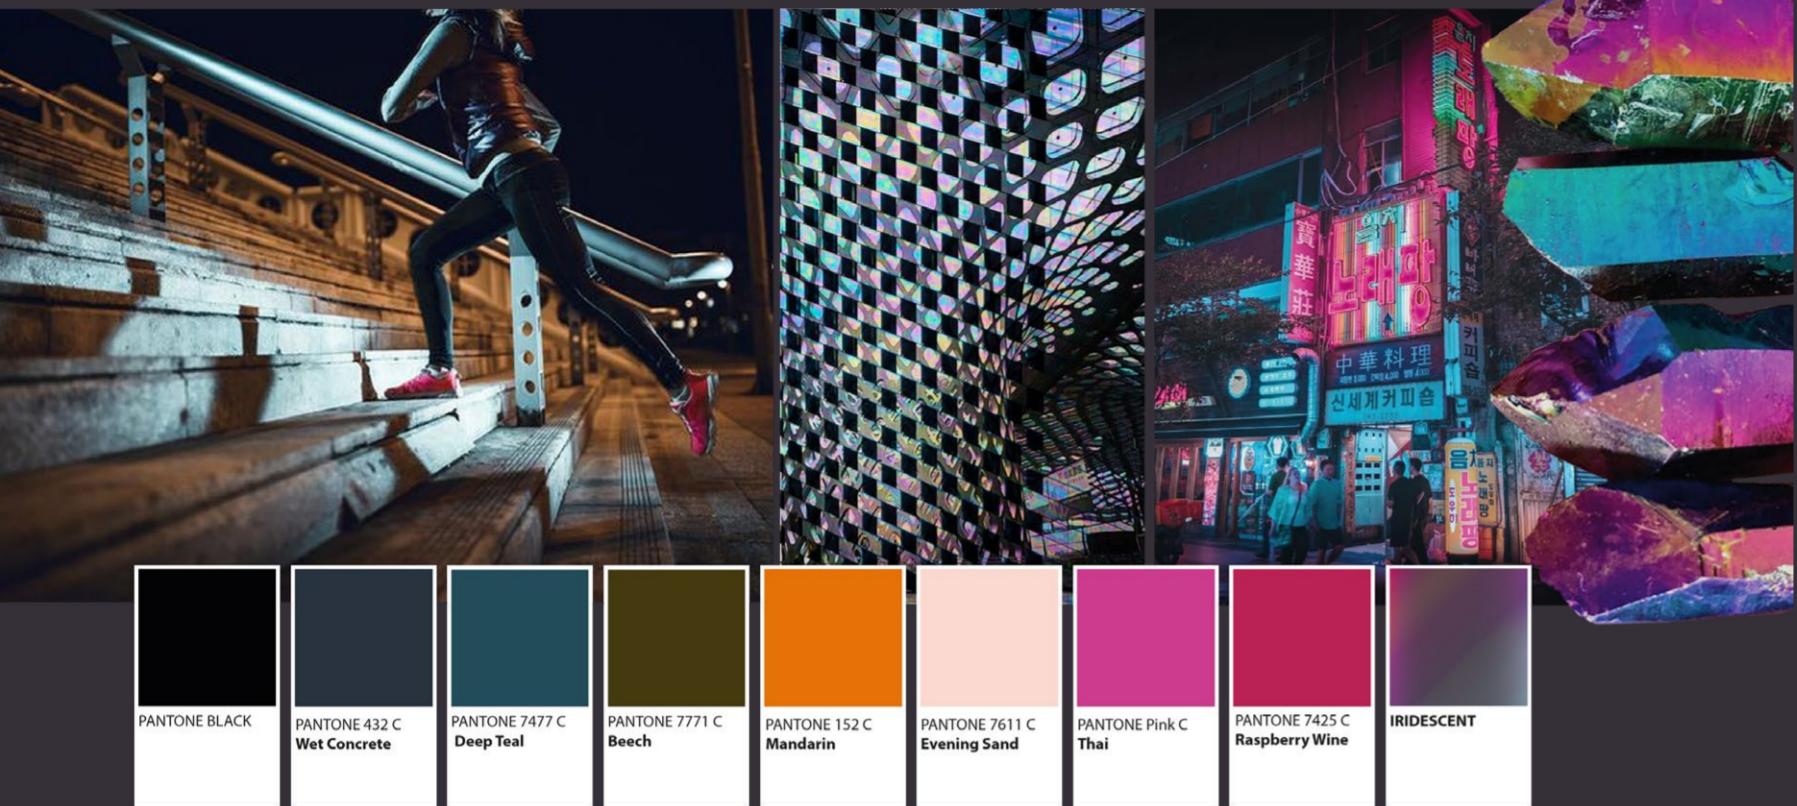

Curious?

Transform Your Core

Never Give Up! More than the brand's claimer, it is a lifestyle where the search for the limit and challenge are imperative.

The collection is inspired by frenetic urban life, where comfort and practicality contribute to the daily transformation to an active lifestyle.

Imagine yourself running through the city at nightfall, glimpsing the colours that emerge as a result of the light projection on buildings and the speed of walking. Tracks of colour and iridescence will appear

from every angle of vision and the urban vibe will be the boost not to give up and keep going. It is with this mind-set that Claw's first collection, **Transform your core**, was designed.

The colour palette is energetic, contemporary and balanced with warm and cold tones. The neutral tones are Wet Concrete and Black. Thai and Mandarin are the most vibrant and daring tones, almost always in balance with **Iridescent**, the optical phenomenon that reflects the colours of the rainbow on surfaces.

The materials used, both in footwear and clothing, are light materials, with elasticity and simple maintenance. From 3D knitwear for shoes, to jersey, interlock and piquet knitwear.

Strength | Persistence | Tenacity | Bravery | Audacity will TRANSFORM YOUR CORE from head to toe.

NEVER GIVE UP with CLAW.

 - Tom Hemp (canhão) + cinzento + azul passam a ser tons crus e envelhecidos -Look mais boêmio
 - Mix de cinzentos (chumbo e cimento)

go Bohemian

Spring/Summer
2016

"You live every moment. You love every day.
You're ready to go Bohemian. Sing a song, tell a story and read a poem. It's all for today and tomorrow it's another day.
Not all those who wonder are lost! For you it's a matter of expressing freedom!
Do you feel like we do?
How Bohemian are you? Can you tell?
Go Bohemian!"

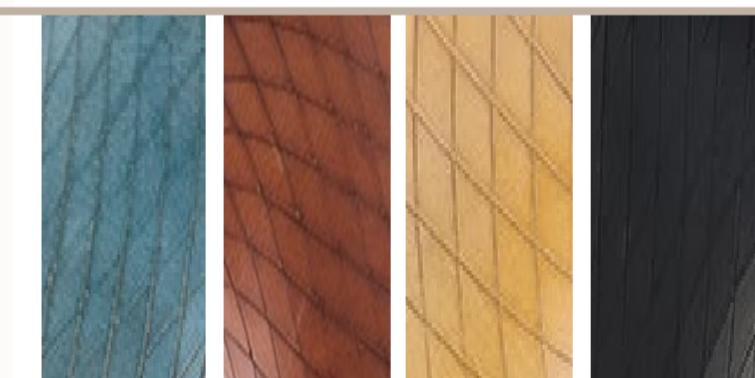

The trend theme selected for the SS16 collection is Sartorial (related to the tailor), which is entitled "**THE FORWARD TRADITIONALIST**". With this theme contrasts of styles, materials, texture and colours are crossed, creating relaxed, feminine and urban looks. The concept for this spring/summer collection is based on the interconnection of aesthetics (strange marriages), that are contrasting in a complementary and balanced way. The key words for the development of the collection are: unlikely connections, collision of styles, fun classics.

the ARTISANS

Autumn/Winter
2015/16

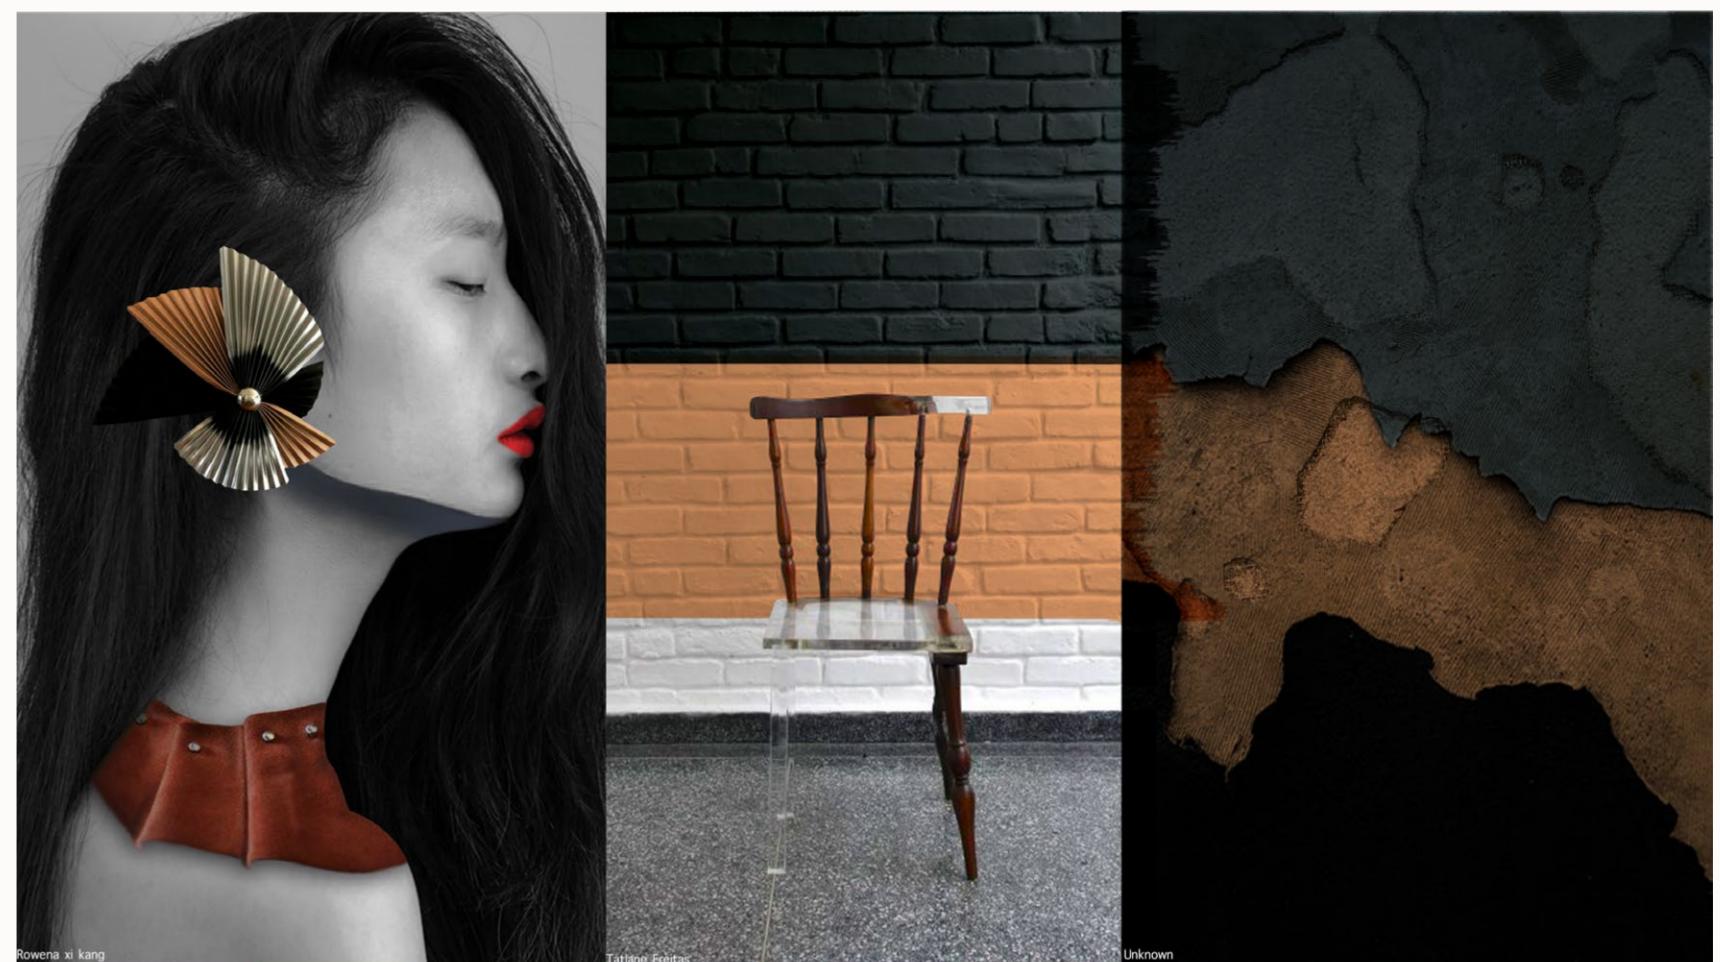

A **ARTISAN** is, by excellence, one who works in a unique way, detailed and meticulous, the details that elevate a product.

This was the concept and thought that gave life to the **DKODE Autumn-Winter 2015 collection**. In which we highlight the details of confection and ennoblement of pieces in a detailed, technical and delicate way.

The colour palette of this collection is characterised as sober and with timeless tones, in which classic colours are the basis of all combinations. Camel is the neutral tone that combines with the warm and cold tones of the season. **Deep Navy** is the tone that cuts across the men's and women's collection,

ideal for casual, city looks. Ochre, more earthy and vibrant, is in charge of warm light accents, perfect for block combinations.

From the cleanest look to the most textured, the selection of leathers gives the shoes antagonistic looks. Especially the 'Delirium' leather - new to this collection and which combines two chromatic tones, adding a slight shine to the worn finish.
